

**Product Features**

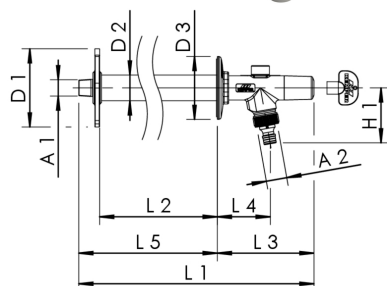

- construction set version, suitable for the brick shell installation and for the subsequent installation in completed outer wall
- universal length for all common installation depths
- high discharge capacity of 40 l / min (1 bar)
- EPDM-seat gasket
- with socket wrench bonnet
- inlet male pipe thread
- matt chrome-plated operating handle with blue identification plate
- with aerator for automatic drainage
- can be extended with optional extension kit
- incl. hose coupling for common connection systems
- free from dead spots
- incl. torsion protection sleeve
- wetted metal parts made of dezincification-free and corrosion-resistant gunmetal (in closed position), resistant against aggressive water

**Standards and Approvals**

- WRAS approval

**Technical Data**

- min. installation depth 150 mm
- max. installation depth 415 mm
- pressure rating PN 10
- max. operating temperature 60 °C
